

SR 89 Widening in Chino Valley

Construction Update April 2008

The Arizona Department of Transportation (ADOT) is preparing to improve State Route (SR) 89 from Center Street to approximately one mile south of Road 4 South. Improvements are needed to increase the capacity of the highway and also provide better and safer access to and from businesses along SR 89.

Construction on the project is anticipated to begin in June 2008.

Utility companies will need to relocate their utilities prior to the beginning of roadway construction. Unisource Energy Services will begin boring under SR 89 in late April in preparation for connecting new gas lines and switching services to the new lines. APS will begin work shortly after relocating poles and wires on the west side of SR 89. Once APS completes their work, other utility companies such as Qwest and Cableone, will be able to begin relocating their utilities. No traffic restrictions are anticipated during the utility relocation process.

Utility relocation work is expected to last approximately six months.

Utility companies will contact property owners to coordinate adjustments to their services. Utility companies will continue to provide service during relocation activities and any outages are expected to be of short duration.

We appreciate your patience and cooperation during construction.
